

Fabric Structures

Monumental Impact, Minimal Weight

exhibiting solutions

Elegant, Integral Solutions: Fabric Structures

Dynamic Look, Lightweight Design

Add impact and mass without adding bulk or weight. Skyline Fabric Structures give you a large presence, but pack small to minimize exhibit operating expenses.

Integral To Skyline Systems

Engineered to work seamlessly with other Skyline exhibit systems, fabric structures can be an integral part of your overall exhibit design solution.

Easy Installation

Steel frame is strong yet sleek to provide maximum graphic area with minimum hardware. Frame sections connect with ease. Finished structures install quickly.

Graphics That Support Your Brand

Skyline has extensive experience in creating fabric graphics for all its exhibit systems. We use the latest technology and a team of experts that print, sew and impeccably finish graphics for the best fit, finish and look.

Regatta™, our 10' curved fabric structure, can be a stand-alone display or an integral part of your overall exhibit solution – or both. Also available in a tabletop model.

Note: Ceiling-mounting cables not shown.

Fabric Structures

Rotating ring is mounted to a SkyTruss® tower within the exhibit for a cohesive look and to avoid rigging expenses.

Double ring provides a unique look and brings company name in sight from everywhere on the show floor.

Rotating disc brings attention to brand message.

Tapered square brings company name into prominence from afar.

Why Our Structures are Better Skyline Quality

Skyline Fabric Structures are designed with your exhibiting experience in mind. They are engineered for easy installation, to look better and are built to last.

Note: Ceiling-mounting cables not shown.

Painted Frame

Painted frame keeps fabric clean! Unfinished metal frames leave residue on hands and fabric.

Stretch-Knit Fabric Cover

Stretch-knit fabric provides a superior look! Graphics are held taut for a better fit and finish.

Vibrant Dye-Sub Graphics

Skyline digital graphics are crisp, brilliant and durable.

Opaque Inner Liner

Layered between the graphic cover and its backing, the liner prevents

exhibit or venue lights from visually washing out your graphic.

Universal Hanging System

Install from venue ceiling or, to avoid rigging costs, from a tower within your exhibit.

Rotating Motor Compatible

Attract attention! Motor works with ceiling or tower installation.

Care Kit Included

Includes gloves for handling fabric and a throw cloth to cover dirty floors during installation and repacking.

Easy-to-Manage Cases!

Skyline Fabric Structures pack in cases that are easy to manage and protect your investment during storage and transport. Most standard models include case!

Cases feature handles and wheels.
