# Modular, Sustainable, Rentable: InterfaceFLOR® Carpet

## Modular Floor Tiles

Get a high-design look without investing in custom carpet! Modular floor tiles let you create patterns and designs that complement your exhibit and give you a finished appearance in exhibits of all sizes.

## Sustainable

Quality InterfaceFLOR carpet tiles are made from recycled materials and are 100% recyclable.

## Rent a Custom Carpet Solution

Go beyond standard show hall carpet. For about the same price you can get a custom look that accents your brand. Skyline has a variety of colors available.

## Easy Installation and Access

Modular floor tiles are quicker and easier to install than bulky, heavy carpet rolls. And tiles are accessible even after the exhibit is installed.

## Tired Feet On the Trade Show Floor?

Choosing an InterfaceFLOR cushion-back option provides increased comfort and offers an ideal alternative to conventional carpet.

For staffers, the best choice in carpet is one that is dense and thick. A dense mat is less tiring and will provide better support. Carpet that is too soft may look appealing, but requires constant balancing, like the feeling of walking on sand. For extended periods, that can be very tiring.

*(Center for Occupational Health and Safety)*

**Exhibit Design: Be Creative With Your Floor!**

Including your floor in your overall exhibit design expands your brand presentation and gives you a cohesive look.

#### Modular Carpet for Varying Exhibit Sizes

InterfaceFLOR carpet is modular so you can create and rent designs that work with your exhibit even if the size of your exhibit space changes.

## ReEntry® Carpet Reclamation Program

Recycled backing and recycled fiber are combined to create Convert™ – the groundbreaking new category of modular carpet that is manufactured with a full color spectrum of post-consumer yarn.

Carpet fiber and backing destined for recycling are sorted and separated for processing.

Reclaimed materials are broken down for use in the manufacturing process.

Convert™ styles contain a minimum of 32% post-consumer recycled content and a minimum total recycled content of 65% with levels that will be continuously increasing.

Skyline will support this mission by collecting all cut, damaged, or stained rental tiles and returning them to InterfaceFLOR to be recycled.

## InterfaceFLOR® Modular Carpet System

Create a variety of designs with standard square, angled, or even curved shapes. Custom-profiled shapes are also available for purchase.

## Rental Carpet Colors

Standard rental colors:

Flame

Margarita

Sunburst

Feldspar

Mica

Maritime

Ocean

Mojave

Strata

Putty

Umber
